

SABANCI UNIVERSITY OPEN ACCESS PUBLISHING OUTPUT (2019-2023)-II

In this study, a bibliometric analysis of OA publications of the SU was conducted using Web of Science (WOS) and Incites data. The data used in the analysis are OA publications from 2019-2023.*

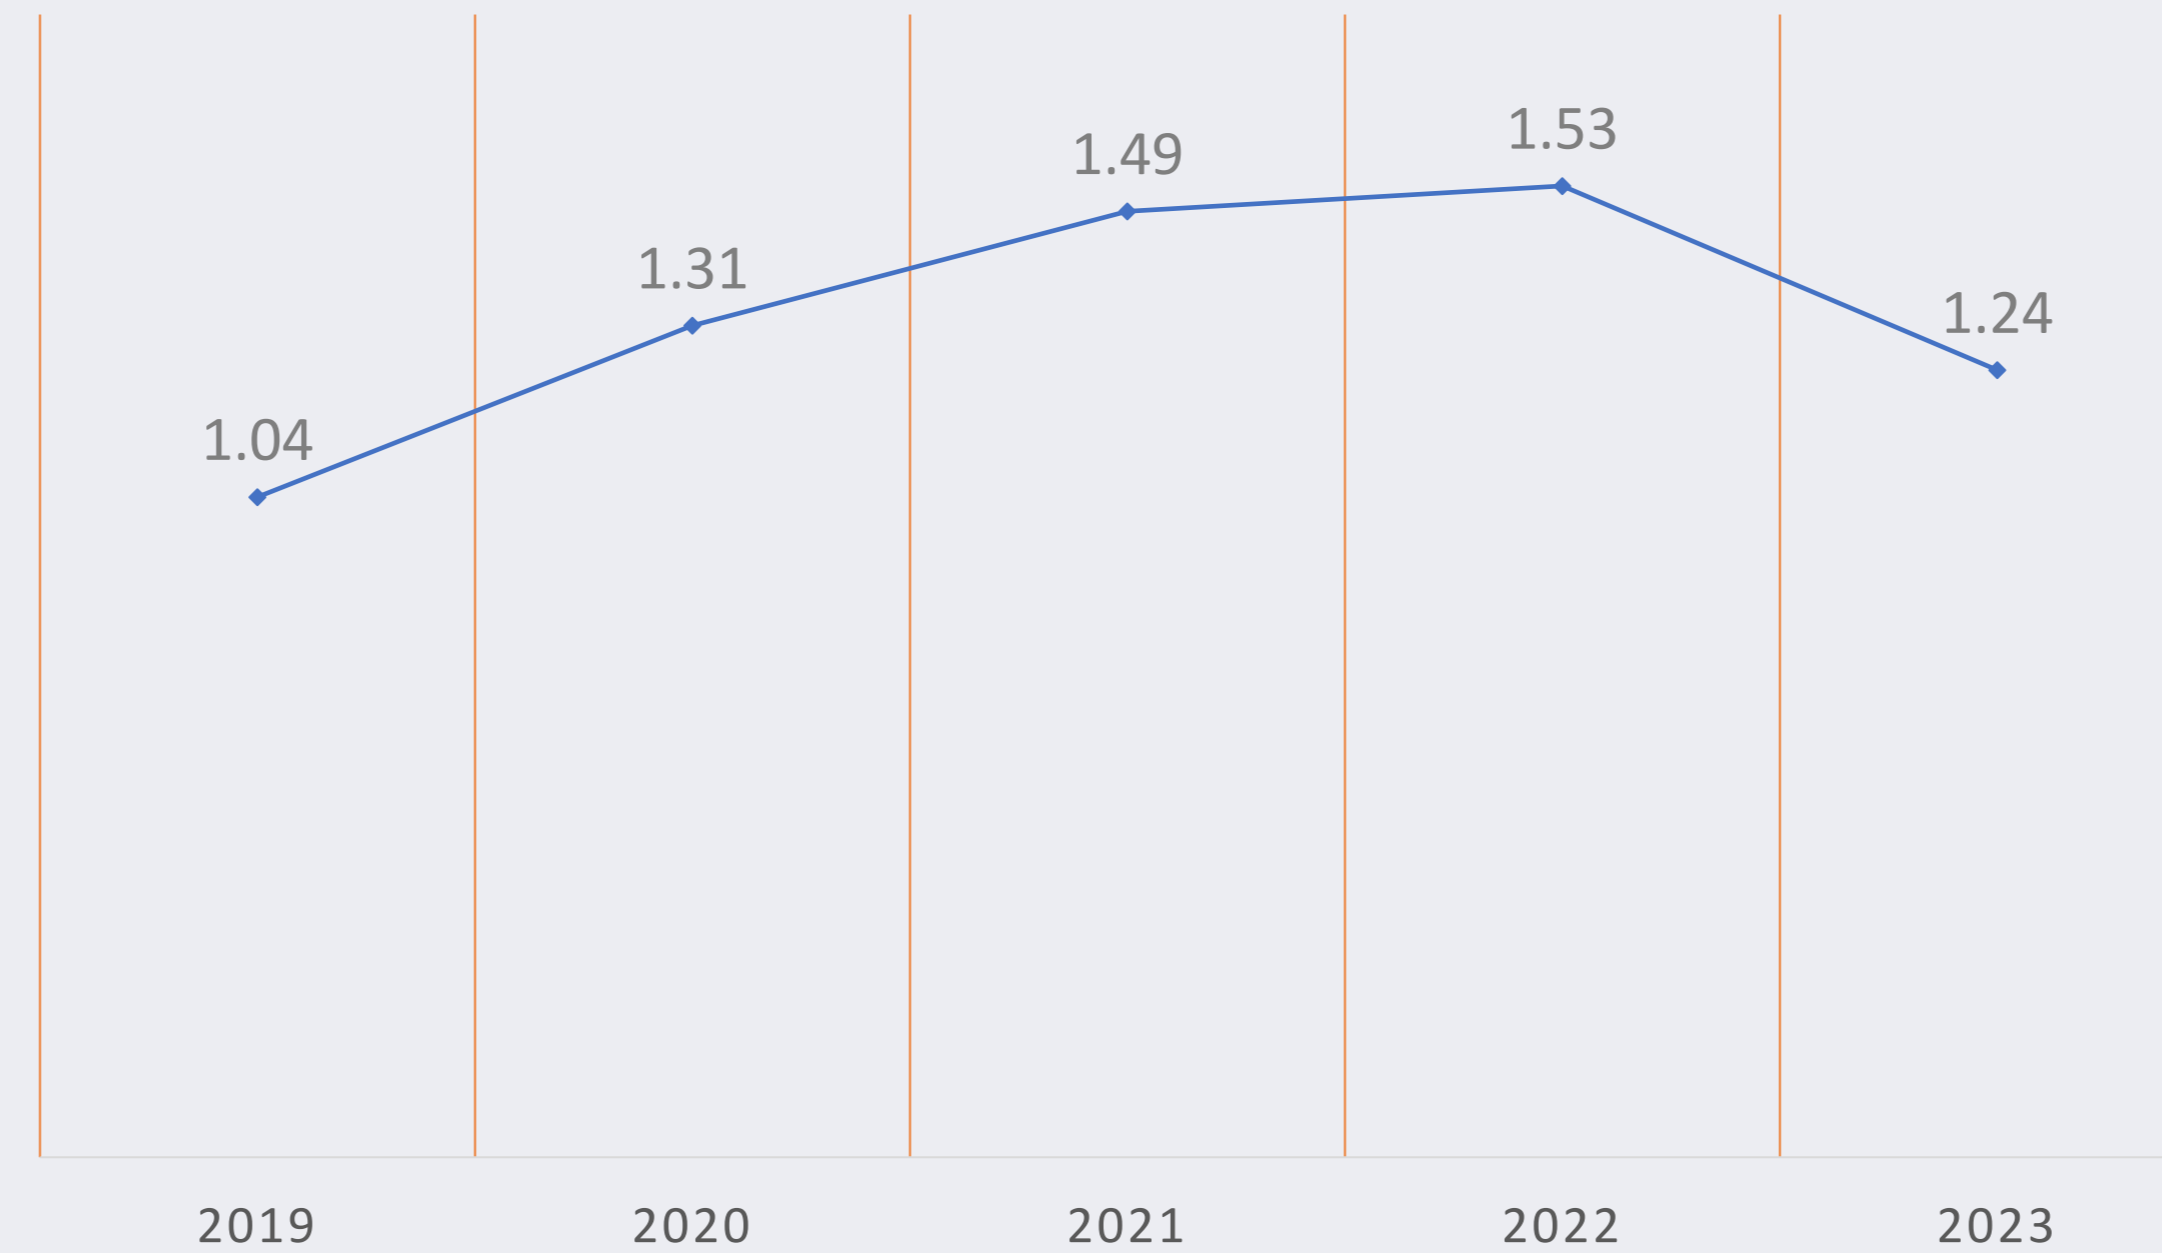

Scholarly Output: 2870

OA Publications by Year

Category Normalized Citation Impact

Journal quartiles

Quartiles	Publications	Publication share (%)
Q1	831	52
Q2	283	32
Q3	95	12
Q4	45	4

Top 5 WOS Research Areas

Subject Area	Scholarly Output	Impact Relative to World	Category Normalized Citation Impact
Materials Science, multidisciplinary	151	1.4	1
Chemistry, multidisciplinary	115	2.25	1.18
Engineering, electrical & electronic	95	0.58	1.24
Physics, applied	85	1.02	0.88
Astronomy & astrophysics	81	0.48	0.95

Top 50 keyphrases by relevance

According to the results,

- The production potential of OA publications is increasing almost every year.
- The ratio of non-OA to OA publications is close.
- The impact value of publications is high compared to the world average.
- OA publications are mostly produced in Q1 journals.
- Publications are produced in many different fields.
